Title:

Fiber closing in to the customer's premises: Making the right design decisions

Biography:

After obtaining his Master Degree in Electronic Engineering in 1999 at the Ghent University, Raf Meersman joined Comsof, a spin-off company of Ghent University. He worked on consultancy projects for various large telecom companies such as Belgacom, Cisco and Siemens in various domains: design of optical networks, design of IP over WDM networks, cost modelling, etc. Since 2005, Raf is Chief Technology Officer at Comsof, where he is also involved in the development of support tool for business case development and roll-out of FTTX networks. Raf is a regular speaker at international conferences on techno-economic topics.
